9 April 1957

TO: Contracting Officer

SUBJECT: Recap of Drift Sight Requirement for F.O.G.

Reference is made to my letter dated 29 March 1957, subject as above, addressed to you.

Attention is invited to the listing of equipments under paragraph 1.a. of referenced letter. It is to be noted that a quantity of 15 Mechanical Connector Boxes are to be furnished by P & E. Subsequent to this letter several discussions were held between the WSPO, [redacted] From these discussions it is our opinion that P & E has "goofed" again and was planning to furnish us an item much more elaborate than required and not consistent with our time requirements.

In view of the foregoing, we have verbally told [redacted] not to fabricate these connector boxes. Further, we have verbally asked [redacted] to proceed with the design and fabrication of a much simpler device.

Based upon the foregoing, request you authorize [redacted] under Contract SP-1914 to furnish F.O.G. with fifteen (15) Mechanical Connector Boxes capable of making the MK-2 Drift Sight Tube compatible with either the MK-1 or MK-3 Hand Control. Also, you might change the contractor's name from "P & E" to "LAC" under the applicable column in paragraph 1.a. of referenced letter.

SUBJECT: Recap of Drift Sight Requirements for FOG

TO: Contracting Officer

Dear George:

1. As a result of numerous configuration changes which affected our requirements for specific types of viewfinders and hand controls and to confirm recent meetings and telecons, I would like to recap our requirements as they are presently established.

a. Following is a listing of the quantities of equipments which you should be procuring for us:

<u>Item</u>	<u>Quantity</u>	<u>Contractor</u>
MK II Drift Sight Tubes	33	P & E
MK II Servo Boxes	30	P & E
Mechanical Connector Boxes	15	<del>P &amp; E</del> LHC
MK II Hand Controls	22	P & E
MK III Hand Controls	12	Baird

In addition to the above, it is contemplated that you will furnish us three (3) MK I hand controls from your resources for use with our C cameras.

25X1

b. Above procurements will result in the following basic drift sight configurations for FOG:

<u>Qty &amp; Type A/C</u>	<u>MK II Tube</u>	<u>MK II Servo Boxes</u>	<u>Mech. Conn. Boxes</u>	<u>Hand Controls</u> <u>MK I II III</u>
---------------------------	-------------------	--------------------------	--------------------------	--

Attention is further invited to the large

DATE 10/11/81

25X1 quantity (thirteen) of spare MK II servo boxes shown. This figure is based upon [redacted] information that the point of economical additional termination and cancellation has been passed.

25X1 2. George, we would appreciate it if **you** can furnish us a schedule of when you can turn over the three (3) MK I hand controls to us. We would like to furnish them to [redacted] so he can install them in production and prior to delivery of the particular aircraft they are scheduled for.

3. If your present procurement releases do not coincide with the quantities in paragraph 1a. above, you may utilize this letter as authority to change your procurement accordingly.

Sincerely yours,
